COLOR THE 1354

A Nothing Dropped Coloring Book

Book One · Ten Pages to Color

Welcome, Colorist!

This is the world of real property — the folks who measure, map, and take care of the buildings where missions happen.

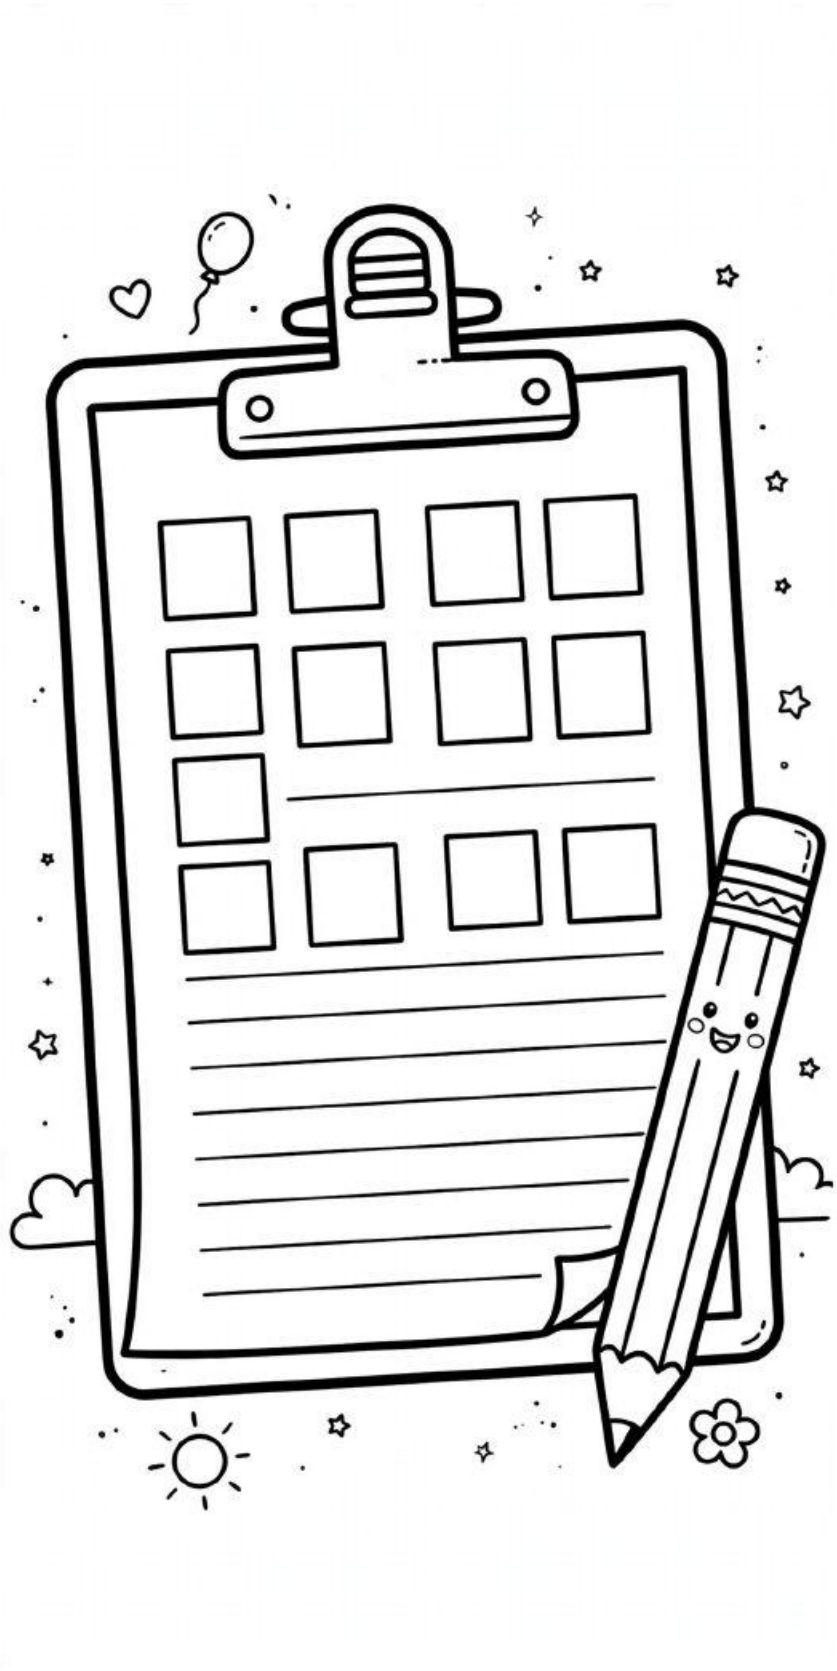

Inside you will find the famous DD Form 1354, the crew who keeps the book true, the mighty measuring wheel, a LiDAR sweep, an armory, a transformer yard, and one small river.

Grab crayons, pencils, or markers. There are no wrong colors here — only yours. Color inside the lines, outside the lines, or turn the whole sky purple. The book does not mind.

When you finish a page, sign your name in a corner. Every great record starts with somebody marking it up.

Print as many copies as you like for your crew.

Nothing Dropped

That’s how rivers start.

This is Book One of the Nothing Dropped coloring books.

Thanks for coloring with the crew.
